

MCM ENGINEERING, INC.

AIRCRAFT CABLE HEAD COLLAR & NOSE COVER

- Helps make cable insertion and removal easier
- Made of durable material that is reusable
- Convenient dust cap lanyard anchor

The MCM Aircraft Cable Head Collar was designed, for MCM cable heads, to elevate the plug from the tarmac when the cable is lying on the ground. This keeps the plug from sitting in water or snow. This collar increases the life of the nose by keeping it off of the ground while it is dragged around the tarmac. Collars are available to fit other manufacturer's aircraft cable heads.

Collar Specifications:

Color:	Black
